HardyCHROM™ Chromogenic Media

HardyCHROM™ is Hardy Diagnostics' line of chromogenic, selective and differential media recommended for use in the primary cultivation and isolation of microorganisms most commonly isolated from clinical specimens.

Easy-to-Read

Vibrant color reactions allow for the rapid identification of target microorganisms.

Accurate

HardyCHROM™ products provide accurate results without additional costly laboratory procedures.

Economical

HardyCHROM™ plates will save both time and labor costs due to ease of use, rapid microorganism detection, and a reduced need for further testing.

Fast

Results can be recorded within 24 hours for the majority of HardyCHROM™ plates.

Effective

Microorganisms can be easily differentiated and identified by colony color.
