

Instructions for Use

CRITERION™ PROTEOSE PEPTONE NO. 3

Cat. no. C6640	CRITERION™ Proteose Peptone No. 3	100gm
Cat. no. C6641	CRITERION™ Proteose Peptone No. 3	500gm
Cat. no. C6642	CRITERION™ Proteose Peptone No. 3	2kg
Cat. no. C6643	CRITERION™ Proteose Peptone No. 3	10kg
Cat. no. C6644	CRITERION™ Proteose Peptone No. 3	50kg

INTENDED USE

Hardy Diagnostics CRITERION™ Proteose Peptone No. 3 is frequently used as a nitrogen source in media formulations for culturing nutritionally fastidious microorganisms.

This is a raw material intended to be used in the making of prepared media products, which will require further processing, additional ingredients, or supplements.

SUMMARY

Proteose Peptone No. 3 is considered a versatile substrate because it can replace a meat infusion-peptone combination in infusion media. It is well suited for the growth of a large variety of organisms including streptococci, staphylococci, meningococci, pneumococci, gonococci, and other microorganisms requiring a highly nutritious substrate.

STORAGE AND SHELF LIFE

Store the sealed bottle containing culture medium at 2-30°C. Dehydrated culture medium is very hygroscopic. Keep lid tightly sealed. Protect dehydrated culture media from moisture and light. The dehydrated culture media should be discarded if it is not free-flowing or if the color has changed from its original tan.

The expiration date on the product label applies to the product in its intact packaging when stored as directed. The product may be used and tested up to the expiration date on the product label and incubated for the recommended incubation times as stated below.

Refer to the document "[Storage](#)" for more information.

PRECAUTIONS

This product may contain components of animal origin. Certified knowledge of the origin and/or sanitary state of the animals does not guarantee the absence of transmissible pathogenic agents. Therefore, it is recommended that these products be treated as potentially infectious, and handle observing the usual universal blood precautions. Do not ingest, inhale, or allow to come into contact with skin.

This product is for laboratory use only. It is to be used only by adequately trained and qualified laboratory personnel.

Observe approved biohazard precautions and aseptic techniques. All laboratory specimens should be considered infectious and handled according to "standard precautions." Refer to the document "[Guidelines for Isolation Precautions](#)" from the Centers for Disease Control and Prevention.

For additional information regarding specific precautions for the prevention of the transmission of all infectious agents from laboratory instruments and materials, and for recommendations for the management of exposure to infectious disease, refer to CLSI document M29: *Protection of Laboratory Workers from Occupationally Acquired Infections*.

Sterilize all biohazard waste before disposal.

Refer to the document "[Precautions When Using Media](#)" for more information.

MATERIALS REQUIRED BUT NOT PROVIDED

Standard microbiological supplies and equipment such as autoclaves, incinerators, and incubators, etc., are not provided.

PHYSICAL APPEARANCE

CRITERION™ Proteose Peptone No. 3 powder should appear homogeneous, free-flowing, and tan in color.

The pH of a 2% solution of CRITERION™ Proteose Peptone No. 3 is approximately 7.0.
