

**Helping Hospitals Define Clean**

# DEFINING CLEAN

While methods to clean and sanitize surfaces and equipment in the healthcare environment vary, the need to measure the effectiveness of cleaning practices is universal. Contaminated surfaces and equipment can quickly lead to microbial contamination, and ultimately, the infection of patients or personnel. Facility managers need quick and actionable data to measure the performance of environmental services staff, and ensure that cleaning has been completed according to quality standards defined by the healthcare facility.

The detection of adenosine triphosphate (ATP), the universal unit of energy in all living cells and present in all organic material, immediately determines if medical surfaces and equipment are truly clean. Used in an increasing number of healthcare facilities worldwide, and recommended by the Centers for Disease Control and Prevention (CDC) as a way to evaluate environmental cleaning, ATP verification instantly provides measurable data on the cleanliness of healthcare environments and surfaces.

Visual inspections of rooms and equipment are too subjective and susceptible to varied results. In addition, surfaces, though visually clean, may still harbor dangerously high levels of contamination that put patients and personnel at risk. Visual assessment or verification of cleanliness with a fluorescent marker and black light provide a false sense of security by suggesting a surface is clean when, in fact, bacteria and organic matter may still be present. ATP cleaning verification systems measure all microbial and organic matter on a surface and give healthcare facilities a reliable technology that can quickly confirm cleanliness.

Hygiena's ATP cleaning verification system offers healthcare personnel a system that is easy to use and can be implemented in any facility. It provides accurate and meaningful results that can help a healthcare facility define a cleaning standard and monitor staff to make sure the cleaning standard is maintained.

## 4 Easy Steps

**1 Swab**

**2 Snap & Squeeze**

**3 Insert**

**4 Read Results**

## SYSTEMSURE PLUS Monitoring System

Results in 15 seconds

Lightweight,  
handheld, and durable

Alphanumeric location IDs

Programmable user IDs

Stores thousands of test results

Programmable floor or  
department testing plans

Runs 8-12 months  
on 2 AA batteries

Simple to use keypad

Self-calibrating -  
no scheduled maintenance

## UltraSnap ATP Swabs

Unique Liquid Stable  
Reagent provides better results

Patented SnapValve™  
technology makes testing easy

All-in-one sampling device

Write-on label

100% recyclable plastic, non-toxic device

Pre-wetted swab  
for maximum sample recovery

Product	Catalog No	Qty
SystemSURE Plus	SS3H	1
UltraSnap Swabs	US2020	100

## Data Tracking & Reporting

### SureTrend: Results Database Management Software

SureTrend is an easy-to-use software application that allows healthcare management to track cleaning verification results, quickly identify problem areas, compare multiple facilities or areas, and generate reports for management and record keeping.

SureTrend's easy-to-use interface and pre-set reports allow managers to start analyzing data immediately.

## Key Features

- PC/Windows® - based software
- Simple click-through installation
- Quick queries and trending of results
- Pre-set reports and charts
- Easy-to-use custom reports and charts wizard
- Option to export data into Excel®
- Data integrity: no data entry or editing
- Server or client installable
- No licensing fees
- Free version upgrades
- Networkable to support multiple locations and SystemSURE devices

**EASY, QUICK & CUSTOMIZABLE**

# HEALTHCARE ATP CLEANING VERIFICATION SYSTEM

## APPLIED BENEFITS

- Actionable results in just 15 seconds
- Extremely user-friendly for any staff member
- 8-12 month battery life eliminates charging issues and costly battery replacement
- Handheld and durable
- Consistently accurate readings give staff trusted, reliable results
- Single-visit room monitoring versus multiple visits with fluorescent marking systems
- Tamper-proof test results cannot be manually edited
- Affordably-priced system and consumables
- Data is effortlessly transferred to Hygiena's SureTrend software
- Versatile for use in any healthcare department:
  - Environmental Services
  - Sterile Processing
  - Infection Control
  - Facility Management
  - Catering Services
  - Quality Audit Teams
  - Hand Hygiene Compliance Training

## DEFINING CLEANING

Patient health and satisfaction depends on the cleanliness of the healthcare environment. Hygiena's cleaning verification system does more than just verify surface cleanliness: The system can evaluate the effectiveness of disinfectants and sanitizer, measure the performance of cleaning staff, and ensure compliance with cleaning protocols. Hygiena's system verifies that the optimal levels of cleanliness are met.

## COST-EFFECTIVE

Utilizing advanced technologies and patented designs, Hygiena manufactures and delivers the most accurate, lowest-cost, and no-maintenance ATP monitoring system to the global healthcare marketplace. This makes Hygiena the leading provider of cleaning verification solutions to healthcare organizations large and small. Hygiena also offers additional flexibility to meet each customer's unique budget and implementation timeline.

## INNOVATION

By combining unique chemistries with innovative patented designs, Hygiena is on a mission to make easy-to-use, convenient products that deliver fast, accurate results for healthcare facilities. SystemSURE Plus is a platform for more tests that use our unique chemistries and patented test designs. Our research and development labs around the globe are focused on creating cutting-edge solutions to help you meet the demands of your environment.

## SERVICE & SUPPORT

With over 100 years of combined experience in supplying ATP cleaning verification systems, Hygiena's extensive knowledge and deep scientific expertise enable us to consistently provide outstanding service and technical support to healthcare customers around the world. Our customer service and sales staff are available for around-the-clock support and training.
