Santa Maria, CA; August 23, 2010 – Hardy Diagnostics has completed construction of its new 25,000 sq. ft. office and warehouse building, known as the “Hardy Enterprise Center”. The building is located at 1360 W. McCoy Lane in Santa Maria. The new building will house some of the Company’s administrative offices, manufacturing rooms and warehouse operations. Also, some additional space will be available for lease. The Hardy Enterprise Center location offers close proximity to the airport, freeway, restaurants, golf courses, Fed Ex and UPS.

The building was designed with numerous energy saving features, such as: solar tubes (ceiling skylights) in the offices, sky lights in the warehouse space, and the most advanced energy saving “T8” fluorescent lighting. The facility also offers the occupants wireless broadband internet throughout.

Jay Hardy, President of the Company states, “We intend to occupy 7 of the 22 units. The other 15 will be rented out”. He extends many thanks to everyone who was involved in the planning and preparation of this new facility, with special thanks being extended to the Company’s maintenance department, consisting of: Marc Barnum, Peter Mueller, and Hugo Rios!

If you are interested in renting space from HEC, contact Jay by email:
HardyJ@HardyDiagnostics.com.
