

For Immediate Release:

Hardy Diagnostics Releases a New Locking Lid Feature for all Contact Plates

Santa Maria, CA; October 9, 2018

Hardy Diagnostics has added an exciting new feature to all irradiated and non-irradiated contact plate products. Introducing the new Lok-Tight™ contact plate with a friction lid design to keep the plate lid in place, and an optional plate locking feature. The Lok-Tight™ design simply adds an optional user friendly twist and lock mechanism to the current friction design, assuring lids stay secured during transport. Hardy Diagnostics is confident this new feature will benefit customers wanting an added measure of security for their environmental monitoring programs.

About Hardy Diagnostics

Hardy Diagnostics is an FDA licensed and ISO 13485 certified manufacturer of medical devices for microbiological procedures in both clinical and industrial laboratories. The company manufactures about 3,000 products for the culture and identification of bacteria and fungi from its Santa Maria, California headquarters. Currently over 9,000 laboratories are serviced by Hardy Diagnostics throughout the nation.

The company was founded in 1980 by Jay Hardy, a Clinical Laboratory Scientist from Santa Barbara, CA. Today, Hardy Diagnostics maintains nine distribution centers throughout the U.S. and exports products to over 50 foreign distributors.

The company's mission is to partner with its laboratory customers to prevent and diagnose disease. For more information, visit www.HardyDiagnostics.com.
